 M4hbod

PROFILE

Passionate **developer** with over **three years** of experience building freelance projects using **Python** and various databases such as **PostgreSQL**, **MongoDB**, and **Redis**. I also have a decent knowledge of **web scraping and automation** using **Scrapy**, **BeautifulSoup**, **Playwright**, and **Selenium**.

PROJECTS

Artemis Music

Telegram Bot

- Built with **Pyrogram** and **py-tgcalls** for seamless Telegram voice chat integration.
- Uses **MongoDB** for data storage and management.
- Deployed and coordinated a large-scale bot network via **Kubernetes**, optimizing for resilience, scalability, and maintainability.

Untitled Movie Platform

- A streaming platform offering a wide selection of movies and series.
- Utilized **Django**, **React** and **Pyrogram**.
- Used **MongoDB**, **PostgreSQL**, and **Redis** for efficient data storage and caching.
- Integrates **Scrapy** for automated data scraping.

Spoticat

Telegram Bot

- Implemented **MongoDB** to manage user data and subscription records efficiently.
- Deployed the bot on a **Kubernetes** cluster for scalability and reliability.
- Built an automated subscription activation pipeline using **Playwright** and **Windmill**, triggered upon user purchase.

Neshast

04/2025 – present

- Open-source event planning platform currently in active development.
- Built with **Django** and **Django REST Framework** for a robust and scalable backend.
- Focused on **decentralization**, allowing self-hosted instances to interconnect and share events.

LANGUAGES

Persian — Native/Bilingual

English — Fluent

EDUCATION

Bachelor of Computer Engineering

2023 – present

Islamic Azad University

SKILLS

Python | Django | Django REST Framework | Pytest | MongoDB | PostgreSQL | Redis |
Kubernetes | GitHub Actions | Docker | Git
